How we get to your price.

Why we scope first

Every campus starts with different teams and different amounts of AI use. Trying it first and scoping together means your price fits how your people actually use it. Your written quote shows what is included before you decide.

What we scope together

- Who uses it first: one team, several departments or the whole campus
- How much AI use you expect
- Which campus agents and systems you connect
- Where it runs and when you want to start

What you get

- Every leading model in one chat
- Group chats, pause AI and @ mentions for your campus agents
- Skills your team can reuse
- Campus data never trains models

Your path to a written quote

1

Tell us about your campus.
Share your size, goals and systems on the pricing form.

2

Try it for two weeks.
Up to 5 people, AI credit included, on real work.

3

Talk it through.
Who uses it next, how much AI use, and which agents to connect.

4

Get your written quote.
Priced to your users and hosting choice.

You can review our security documents in our Trust Center.
