How we get to your price.

Why we scope first

Every campus keeps its data in different systems. Scoping first means your price fits the systems and questions you start with. Your written quote shows what is included before you decide.

What we scope together

- Which systems you connect: LMS, SIS, CRM, ERP or others
- The first questions you want answered
- How many students and records are in scope
- Where it runs and your timeline

What you get

- Campus systems connected in one layer
- Records reconciled into one trusted student view
- Role-based access beneath every agent
- Campus data never trains models

Your path to a written quote

1. **Tell us about your campus.** Share your systems and goals on the pricing form.
2. **Get a free data assessment.** We map where the data for one question lives.
3. **Talk it through.** Which systems, questions and records come first.
4. **Get your written quote.** Priced to your systems and hosting choice.
