RETENTION AGENT PRICING

A price that fits your students and systems.

We scope a proof of concept on one system with your team, then send a written quote.

START WITH A paid proof of concept on one system, starting with the LMS.

How we get to your price.

Why we scope first

Every campus has different students, systems and support teams. Scoping first means your price fits the students and systems you bring in. Your written quote shows what is included before you decide.

What we scope together

- How many students are in scope
- Which system to start with (usually the LMS), then which to add
- The support signals and workflows your advisors use
- Where it runs and your timeline for the proof of concept

What you get

- Early flags for students who may need support, using signals your institution picks
- Drafted check-ins your advisors review and send
- Results on your own data before a full rollout
- FERPA compliant, and campus data never trains models

Your path to a written quote

1

Tell us about your campus.
Share your size, goals and systems on the pricing form.

2

Talk it through.
Pick the first system and the signals that matter to your advisors.

3

Get your written quote.
For the paid proof of concept, plus what a full rollout would look like.

4

Start your proof of concept.
Advisors see flags and drafted check-ins on your own data.

You can review our security documents in our Trust Center.
