VIRTUAL TEACHING ASSISTANT PRICING

A price that fits your courses.

We learn about your courses and LMS first, then send a written quote for what you will use.

START WITH A scoping call with our team about your courses and goals.

How we get to your price.

Why we scope first

Every campus teaches different courses on different systems. Scoping first means your price covers the courses you will actually use. Your written quote shows what is included before you decide.

What we scope together

- How many courses and students you start with
- Which LMS it connects to
- Where it runs: hosted by CampusMind or in your Azure tenant
- When you want it in front of students

What you get

- Course help for students, drawn from your course materials
- Instructors set the limits, tone and teaching approach
- Works inside your LMS
- Campus data never trains models

Your path to a written quote

1. **Tell us about your campus.** Share your courses, students and LMS on the pricing form.
2. **Talk it through.** A short call on your courses, goals and where it runs.
3. **Get your written quote.** Priced to the courses and hosting you choose.
4. **Start with your first courses.** Add more courses when your instructors are ready.

You can review our security documents in our Trust Center.
